How To Put On Our Slipcovers

Frame

- Take note of the attachments and line up the slipcover over the frame.
- Gently pull straight down a bit at a time, moving around the frame and adjusting as you go.
- Secure each Velcro attachment, tuck in any edges and smooth any wrinkles.

Cushion

- Gently fold the cushion in half and slide it into the case.
- Release the cushion to allow it to expand, then push the filling into the corners.
- Zip closed and fluff gently.

Pro Tip:

Apply machine- and hand-washable slipcovers while slightly damp for the best fit. For a more tailored look, we recommend steaming to release wrinkles.

Slipcover Cleaning Tips

Machine- and Hand-Washable

- Use low water temperature for washing
- Make sure the zipper is closed on each cover to prevent damage while washing
- Do not overload your washer
- Air drying is preferred to preserve the slipcover, or tumble dry with no heat
- Don't dry fully — apply the slipcover slightly damp to ensure best fit

Spot-Clean Only

- Blot spills with a clean cloth as quickly as possible, then spot clean with a water-free dry-cleaning solvent if needed
- Pretest the solvent in a small, inconspicuous area first
- Clean spots and stains from the outside to the middle of the affected area

Dry Clean Only

- We recommend leaving the cleaning to the professionals for these pieces.

Each slipcovered style comes with its own unique cleaning instructions on an attached label to ensure proper care and longevity. Follow each style's instructions closely.
