Overview

Marbled glass spheres seem to extend and reach across smooth brass rods. Each globe is individually blown, shaped and sculpted by hand through a one-hour process. The finish on the brass frame is achieved through a specialized process that turns the brass into an almost black hue before the rod is polished smooth. Brass and glass are 98% recyclable. Designed and sustainably made in Poland by Schwung. This piece is compatible with sloped ceilings. This piece is compatible with sloped ceilings.
