Concrete

Care Instructions

- Regularly dust with a dry, soft cloth. Do not use furniture polish.
- Avoid use of cleaning products with acid, vinegar, lemon and ammonia, as abrasive ingredients can damage the finish.
- Keep out of direct sunlight and away from heat.
- If concrete piece is suited for outdoors, cover or store indoors during inclement weather.
- Avoid direct contact between sharp objects and the surface.
- Use coasters and trivets to protect the surface from wet or hot cups or dishes.
- Address spills immediately by wiping with a dry, soft cloth.
- Always lift and carry, not drag, when moving furniture.
- Use felt pads on the bottom of objects that will remain on the tabletop for long periods, especially natural stone materials or items containing moisture. Residual moisture can transfer to the concrete and cause discoloration.
- Do not use high pressure washers as it can reduce protection of the coating layer.
