	Tipping Hardware	2 SET

★ REMARK:There is a tip restraint kit provided on the back of this product please read the direction thoroughly and install immediately

Adjusting Floor Levelers

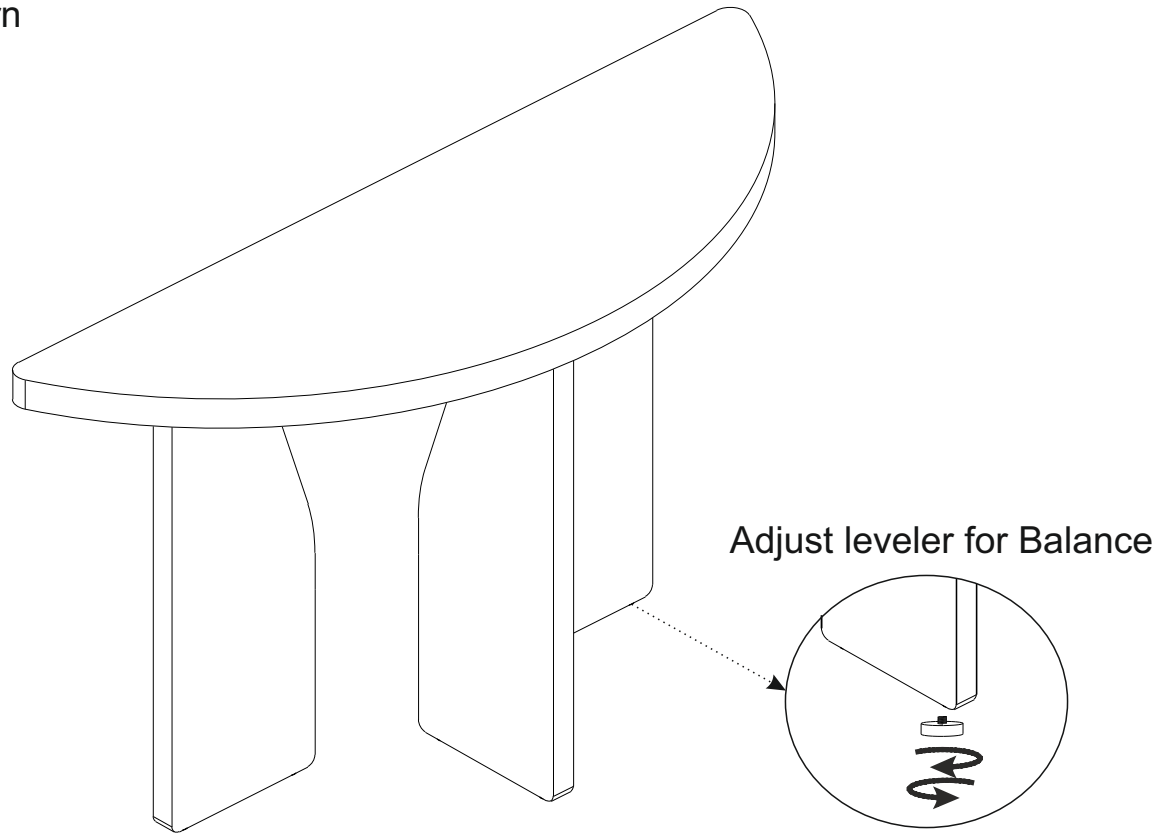

Your furniture has been expertly crafted and pre -adjusted by professionals. However, slight shifts can occur during transportation. If you notice that the doors are not perfectly aligned or the furniture wobbles, a quick adjustment can help ensure stability and a seamless look.

Adjust the Floor Levelers

Check for Stability – Place the furniture in its final position on a level surface. If it wobbles or doesn't sit evenly, the floor levelers need adjusting.

Locate the Levelers – These are small adjustable feet found at the bottom corners of your furniture .

Adjust as Needed – Using your hand or a wrench, turn the levelers clockwise to raise or counterclockwise to lower the furniture . Make small adjustments and check stability after each turn

If you need further adjustments, repeat the process in small increments.

Important Notes:-

While adjusting the hinges, firmly hold the door in place to prevent it from falling and getting damaged.

Repeatedly tightening and loosening the hinge screws can cause the screw holes to widen. To avoid this mininmize adjustments and avoid over tightening.
