

SONORA SCULPTURE

ASI22

H: 4 IN
W: 12 IN
D: 10 IN

Inspired by interlocking segments of a rattlesnake, the Sonora Sculpture balances raw texture with refined materiality. Three smooth white marble spheres—each revealing subtle tonal variation and natural veining—rest against a coiled, scale-textured form finished in a dark, patinated bronze tone. Both sculptural and symbolic, this piece delivers a grounded, desert-inflected sophistication with an artful edge.
