

OUR MATERIALS

All materials used in our products are optimal for outdoor use. They are made to withstand wide temperature ranges, UV rays, water, and overall harsh atmospheric conditions.

MATERIALS & CARE

Crafted with precision and designed for lasting comfort, Azzurro Living's materials redefine the standard for outdoor living. We go beyond the ordinary to ensure that your outdoor furniture remains as vibrant and resilient as the day you first brought it home.

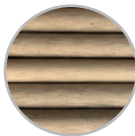

Our materials are not just easy to clean; they epitomize the essence of low maintenance. Azzurro Living sets the bar for outdoor living with materials that not only boast enduring durability but also make maintenance a breeze.

ALL-WEATHER WICKER

We manufacture all-weather wicker from the highest quality man-made HDPE fibre. This remarkable material has many benefits including high suppleness, tear resistance, UV resistance and weather resistance.

To clean, wash the furniture with a solution of mild detergent and water, rinse with clear water, and dry thoroughly.

ALL-WEATHER ROPE

Our rope is Olefin based and performs excellently for outdoor use as it is climate and UV-resistant.

It is easy to maintain and can be cleaned with a solution of mild detergent and water. Once detergent and water are applied, simply rinse with clear water, and dry thoroughly. Do not use oil cleaners.

TEAK HARDWOOD

Sustainably harvested and inherently durable, Teak is naturally amber colored but weathers to a silvery gray patina when left outside.

Quickly clean the spillage by dabbing the area clean with a clean, absorbing cloth. Use clean water to spray dirt away from the surface and dry thoroughly. Do not use soap. To maintain teak's natural honey-amber color, applying teak oil prevents weathering. Sealers also protect the wood from UV radiation, molding, and water damage.

POWDER COATED ALUMINUM

Our powder coated aluminum is lightweight and very durable. We guarantee excellent resistance to corrosion, weather, and water. Our aluminum is precision welded, hand polished, and requires little maintenance.

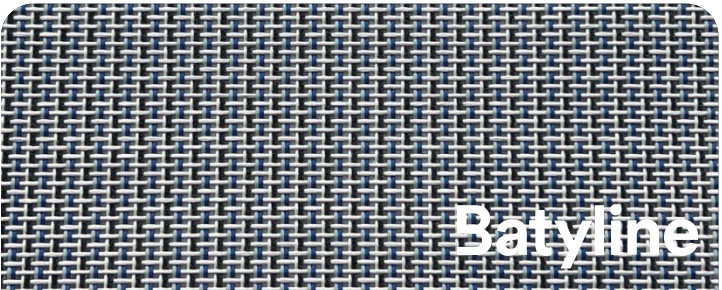

To clean, wash the furniture with a solution of mild detergent and water, rinse with clear water, and dry thoroughly.

CONCRETE (GFRC)

Our concrete products are made from GFRC (glass fiber reinforced concrete). This combination produces light yet strong products with a contemporary solid concrete appearance. Each product is finished individually, each product is unique with variations in shading and marks.

Dirt and most stains can be removed from GFRC by scrubbing with a mild detergent and water.

BATYLINE ELIOS BY SERGE FERRARI

Inspired by the classic style of tweed suits, Serge Ferrari introduces its softest innovation for upholstery.

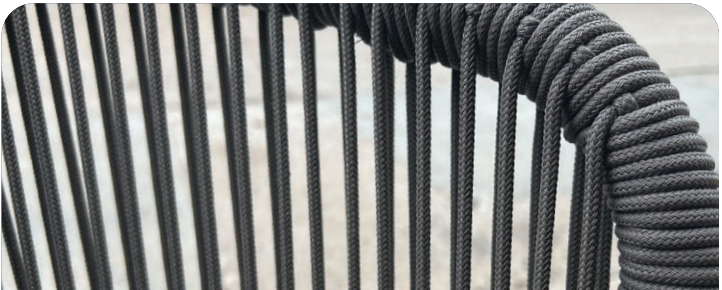

Spray mild cleaner on the surface and let sit for 2-3 minutes. Use a soft bristle brush and brush in a circular motion. Flush with plenty of clean water, it is very important to avoid residue drying on the surface. Wipe the surface with a clean, dry cloth.

NATURAL STONE

The types of stone we have selected are natural, and therefore unique. Any crystals or streaks are specific characteristics of each stone.

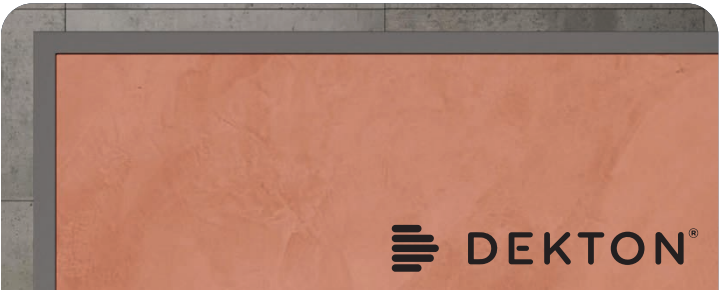

To maintain, avoid treating the stone with aggressive protective substances that can alter color or texture. Simply wash with a mild detergent and water, rinse with clear water, and dry thoroughly.

ALL-WEATHER TEXTELENE ROPE

Sling or Textelene, a woven, vinyl-coated, high-strength polyester yarn, is ideal for outdoor furniture. Its synthetic coating ensures superior weather and UV resistance, coupled with exceptional mechanical and chemical strength.

The non-absorbent nature promotes quick drying, maximum stain and mold resistance, and easy cleaning with mild soap and water.

DEKTON®

Dekton® by Cosentino combines the qualities desired by the chef in all of us. It is a clean surface that is nice to touch and resistant to the daily grind that takes place in a home over years of use.

Brush off loose dirt. Simply wash with a mild detergent and rinse with clear water, and dry thoroughly.

CUSHIONS & FABRIC

Azzurro Living cushions are made of premium quality foam covered with high-end Solvita Performance Fabrics. Our plush chenille fabric is intended to mimic the look and feel of a soft and luxurious indoor fabric with the durability to go outdoors, the perfect complement to Azzurro Living products.

Engineered to withstand the demands of rigorous cleanings and heavy use in high traffic commercial environments as well as home use. Designed to weather the elements, resist stains, spills, fading and mildew.

Azzurro Living fabrics are amazingly easy to clean. Most spills clean up with just mild soap and water.

Furniture covers are strongly recommended to protect furniture from the elements and minimize aging.

PERFORMANCE FABRICS

MATERIALS

MATERIALS

Azzurro Living designs commercial grade outdoor furniture using carefully selected performance materials chosen for strength, longevity, and beauty. Each piece is crafted to resist stains, spills, fading, mildew, and harsh environmental exposure, making it well suited for demanding hospitality settings. From refined weaving and precise welding to durable powder coating and premium performance fabrics, every material is tested and refined to ensure lasting comfort and enduring quality for hotels, resorts, restaurants, country clubs, and public spaces.

ALL-WEATHER WICKER

Azzurro Living takes pride in crafting and utilizing the finest UV-rated all-weather wicker available. This extraordinary material offers numerous advantages, including exceptional suppleness, tear resistance, UV protection, and resilience against various weather conditions. Unlike traditional rattan and wicker materials that are vulnerable to the elements, all-weather wicker stands out for its remarkable durability. All of our wicker is meticulously produced from raw materials in-house, using pure HDPE, never recycled wicker. This commitment ensures long-lasting quality, as using recycled scraps can lead to premature aging, cracking, and resin failure. We create our products to endure, making them a reliable choice for high traffic environments.

ALL-WEATHER ROPE

All-weather ropes are crafted with care: the outer layer, woven with olefin fiber, stands strong against the harshest elements, retaining its color and appearance year after year. The inner layer, a combination of textelene and woven polyester fibers, provides remarkable resilience and strength, ensuring it bounces back to its original form after use and resisting tearing, shrinking, and deformation. Built for durability, all-weather rope ensures a longer lifespan for years of enjoyment, not seasons.

ALL-WEATHER TEXTELENE ROPE

All-weather textelene rope, a resiliently woven, vinyl-coated, high-strength polyester yarn, is a top choice for outdoor furniture. Its synthetic coating guarantees exceptional weather and UV resistance, along with impressive mechanical strength and resistance to chemicals. With its moisture-repelling properties, it dries rapidly and offers maximum stain and mold resistance. Designed for long-term use in commercial settings, it significantly extends the lifespan of outdoor furniture.

PERFORMANCE FABRICS

Our plush chenille fabric effortlessly combines indoor luxury with outdoor durability, making it the perfect match for Azzurro Living products. It not only matches Sunbrella's 5-year warranty but surpasses their quality standards, ensuring long-lasting beauty.

With a soft texture and a luxurious appearance, this chenille fabric looks stunning year after year in commercial environments.

Engineered for easy cleaning and heavy use in commercial settings, all Azzurro Living fabrics feature a water-and-stain-repellent finish. They withstand the elements, resist stains, spills, fading, and mildew, and are easily cleaned with mild soap and water.

Azzurro Living cushions are made of premium quality, high-density solid foam with a dacron wrap, retaining plush support in heavily frequented areas. We manufacture the cushions in-house with a stringent quality control program.

Dekton by Cosentino is a sophisticated blend of over 20 natural minerals that produces a long-lasting, high-performance material backed by a 25-year warranty even in the most demanding conditions, such as facades or floors. Its exclusive TSP technology employs immense pressure to sinter mineral particles together, creating a ultracompact surface free from micro-defects, tensions, or weak points. Dekton boasts UV resistance, unaffected by time, and can withstand extreme temperature changes and direct heat. It's non-combustible, A-1 certified, and impressively resistant to stains, scratches, and impacts, scoring 7/10 on the Mohs scale. With its low porosity, it doesn't harbor bacteria and is suitable for all food contact types.

SINTERED STONE

Sintered stone is a high performance, man made surface created by compacting all natural minerals under extreme heat and pressure, resulting in a slab with the strength and beauty of natural stone and none of its limitations. It is completely non porous, resin free, and highly resistant to heat, scratches, stains, UV exposure, moisture, frost, and harsh chemicals, making it ideal for both indoor and outdoor applications. Engineered to withstand heavy use and wide temperature ranges, sintered stone remains easy to clean, hygienic, and exceptionally durable, while offering refined aesthetics through controlled veining, large scale formats, and a range of matte and polished finishes that deliver seamless beauty with lasting performance.

Batyline

Batyline fabrics are sought out by the biggest brands in furniture because of their exceptional strength properties and durability in outdoor commercial conditions. Its fabrics offer an unmatched level of performance thanks to the company's patented and exclusive Smart Yarn technology. Incorporating a protective waterproof film, they're ideal for the most demanding outdoor applications. Its easy cleaning and resistance to relentless day-to-day stains allow users to more fully enjoy their outdoor living spaces.

WeatherWood

WeatherWood is a highly durable, low-maintenance, and eco-friendly material crafted from recycled high-density polyethylene lumber, making it ideal for high-traffic environments. Engineered to resist rot, mold, mildew, and cracking, it withstands extreme weather conditions, including harsh sunlight, heavy winds, snow, and salt exposure. Unlike traditional wood, WeatherWood requires no painting, staining, or sealing, and its UV-resistant coating helps maintain its appearance over time by preventing fading and deterioration. With a warm, inviting aesthetic and exceptional durability, WeatherWood's time-tested, superior design ensures long-lasting performance year after year.

alu^uwood

AluWood is Azzurro Living's modern answer to the timeless beauty of wood. Crafted from hand painted, powder coated aluminum, it faithfully mirrors the warmth and character of natural timber while offering the strength and permanence of metal. Each piece is finished by hand to evoke the depth and nuance of aged wood, without the upkeep real wood requires. Resistant to weather, rot, and decay, AluWood is designed to remain effortlessly beautiful season after season, bringing enduring elegance to spaces meant to be lived in.

MATERIALS

TEAK

Sustainably harvested and naturally rich in oils, teak is prized for its strength, beauty, and longevity outdoors. Its dense grain resists water, rot, insects, and decay, allowing it to withstand sun, rain, and snow without warping or cracking. Left untreated, teak gradually weathers to a soft silver-gray patina, shaped by climate, exposure, and time. To preserve its warm, golden tone, apply a teak oil or sealer once or twice a year; for deeper restoration, lightly sand with 120–220 grit before oiling to revive its amber glow. Designed to endure for decades with minimal maintenance, teak grows more beautiful with age.

POWDER COATED ALUMINUM

At Azzurro Living, we prioritize quality and sustainability in our materials. Our aluminum frames are crafted from 100% pure aluminum, known for its lightweight yet remarkable durability. It boasts excellent resistance to corrosion, weather, and water, never succumbing to rust, even when exposed to the elements. We apply Tiger branded powder coating, the same technique used on cars and heavy-duty machinery, to ensure a strong, long-lasting finish that can withstand the harshest conditions.
