

### CAUTION

Turn off the main power at the circuit breaker before installing the fixture in order to prevent possible shock. If you are unfamiliar with proper electrical wiring connections, obtain the services of a qualified electrician.

### GENERAL

Read all instructions carefully for safe operation and installation.

All electrical connections must be in accordance with local and national electrical code (N.E.C.) standards. Remove the fixture and mounting package from the box. Make sure no parts are missing by referencing the illustrations on these Installation Instructions. Please contact Blackjack Lighting at 847-941-0588 if any parts are missing or damaged.

This product is suitable for WET locations.

## PREPARATION

1. Remove the fixture from its box.
2. Remove the ceiling plate(10) from the canopy cover(11) by loosening the three thumbscrews(12).

## MOUNTING

3. Pull the supply wires(2&4) and the house ground wire(6) out of the outlet box(1) and thread them through the large center hole in the ceiling plate(10). Attach the ceiling plate(10) to the outlet box(1) by using the two mounting screws(9).

*NOTE: It is recommended that the installing electrician measure / adjust suspension wires before installation on the ceiling. ALL THE SUSPENSION WIRES NEED TO BE THE SAME LENGTH. If they are different lengths, the fixture will not sit level and may warp. This also allows the installer to be able to wrap up wire inside the canopy for easier installation.*

## ELECTRICAL CONNECTIONS

4. Using the wire connectors(8), connect the white supply wire(2) to the white fixture wire(3); connect the black supply wire(4) to the black fixture wire(5); and connect the house ground wire(6) to the fixture ground wire(7). Tuck all of the wires back into the outlet box(1).

## FINAL ASSEMBLY

5. Insert/adjust silicone lens. Stretch lens to fit entire circumference; gently press lens in between two grooves on inside of extrusion (See Figure 1). Using a small rubber spatula may be helpful.

6. Adjust the three suspension cables to the appropriate length by either pushing the individual cables up into the adjustable gripper(13) or by pushing the small barrel on the bottom of the gripper(13) upward. This will release the cable tension and allow the suspended cable to increase in length.

7. Secure the canopy cover(11) to the ceiling plate(10) by tightening the three thumbscrews (12).

8. Once the canopy cover(11) is in place, use the adjustable grippers(13) to fine tune the fixture suspension cable lengths so that the fixture is level and the three cables are even in length.

## DIMMING

Fixture Dimming Type: TRIAC, ELV, or 0-10V dimmable. For recommended dimmers, see [blackjacklighting.com](http://blackjacklighting.com)

### HARDWARE

**Wire Connector (#8)**  
Qty. Included: 3

**Mounting Screw (#9)**  
Qty. Included: 2

**Thumbscrew (#12)**  
Qty. Included: 3

1. JUNCTION BOX  
(supplied by others)
2. WHITE WIRE SUPPLY
3. WHITE FIXTURE WIRE
4. BLACK SUPPLY WIRE
5. BLACK FIXTURE WIRE
6. BLACK SUPPLY WIRE
7. FIXTURE GROUND WIRE
8. WIRE CONNECTORS
9. MOUNTING SCREWS
10. BACK PANEL
11. DECORATIVE PLAN
12. THUMBSCREW
13. GRIPPER
14. FIXTURE BODY
15. DIFFUSER/LENS
