Staghorn Green Coral Object

1200-1045

New

Overall: 17"h x 6" dia.

Finish: Green

Materials: Ceramic

Item Weight: 4 lbs.

The Staghorn Green Coral Object is a sculpture that resembles stacked horns of coral that look as if they have been plucked from the ocean floor. The dark clay ceramic piece was thrown and carved before being covered in a sunken green moss glaze that adds even greater texture t with its abundance of pitting on its surface. The depth and dimension of these artful treatments make it feel naturally aged. The speckled green decorative accessory stands 17 inches tall.
