Elegant and sculptural, the Tamara Tall Vase is crafted from pale peach-colored mouthblown glass that is infused with delicate flecks of gold to catch the light and add a subtle shimmer. Its columnar silhouette has been artfully stretched with tongs to create the organic, fluid shape. This lends the studio- or gallery-worthy vase a one-of-a-kind feel. The opulence achieved is reminiscent of the ancient artisanship of glass-blowing for which the Venetians were renowned.
