

Care Instructions

Cross Sideboard

Cross Sideboard – designed by Matthew Hilton

To prolong the life of the product and retain its appearance and functionality, we would like to give you some relevant information and care advice:-

This unit is manufactured with either oak, black stained oak or walnut.

Craftsmen manufacture this product and there is variety between each unit. This is because wood is a natural product, with natural colour and grain variations.

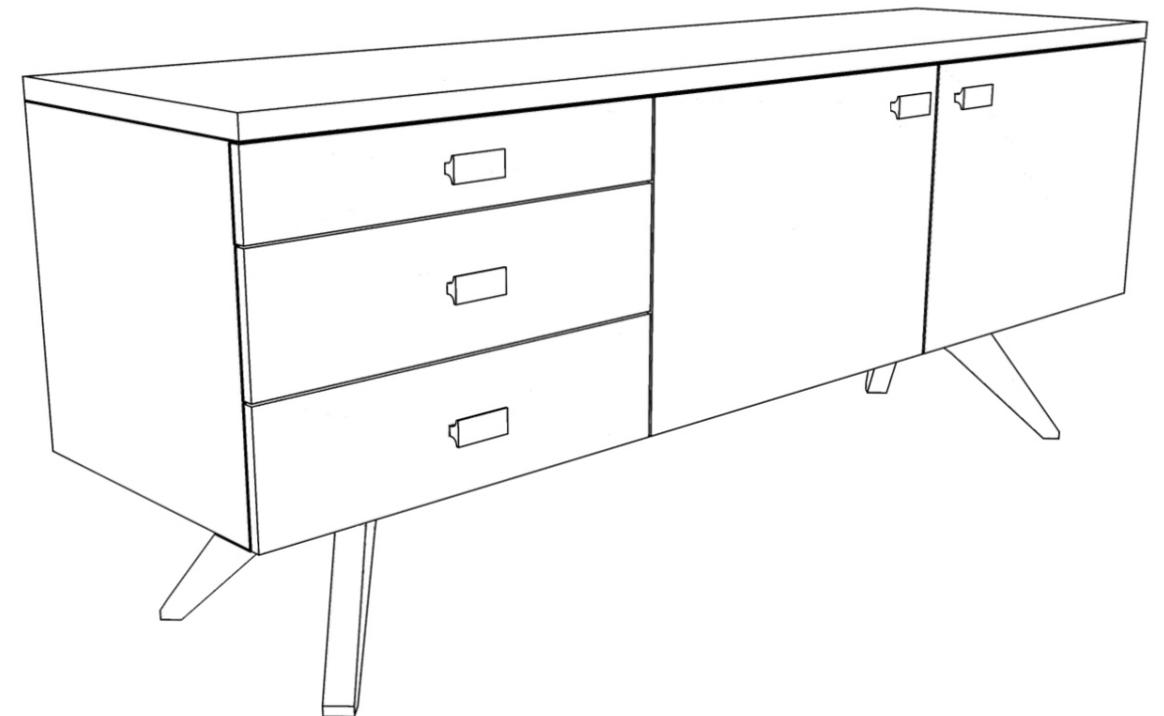

The top, side and drawer faces are matched to ensure a consistent aesthetic throughout

Natural timber is affected by sunlight; this can cause the wood colour to darken. For this reason (especially if placed in direct sunlight) it is recommended that placing objects in the same position for long periods of time is avoided. This potential colour adjustment becomes less relevant as the product ages.

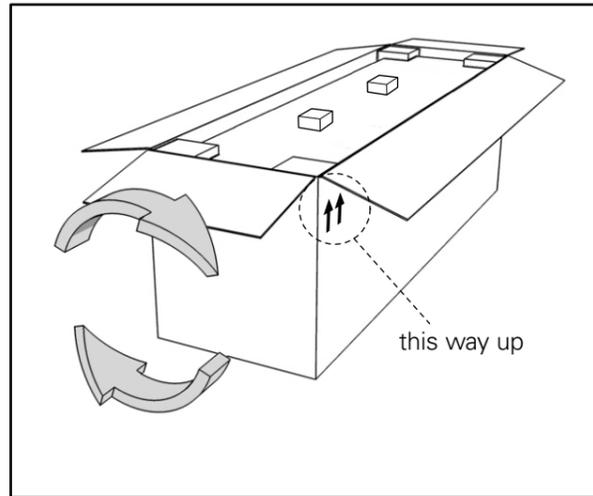

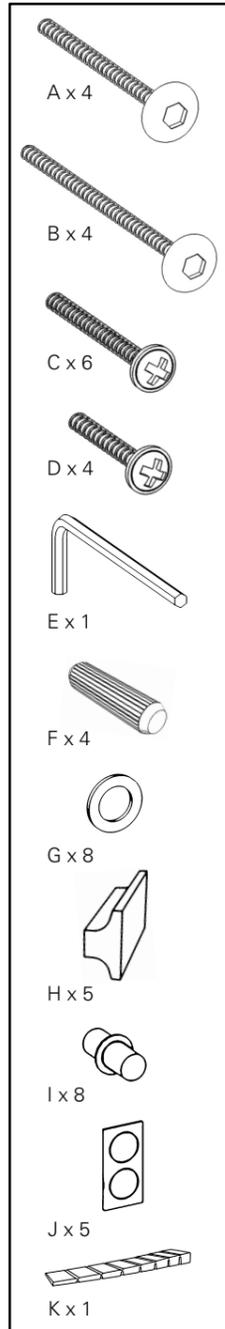

It is recommended that no abrasive cleaners or solvents are used to clean the unit. Please only use proprietary furniture polishes or alternatively, warm water with a diluted mild detergent.

We thank you for purchasing this product and wish you many years of enjoyable and functional use.

Assembly Instructions

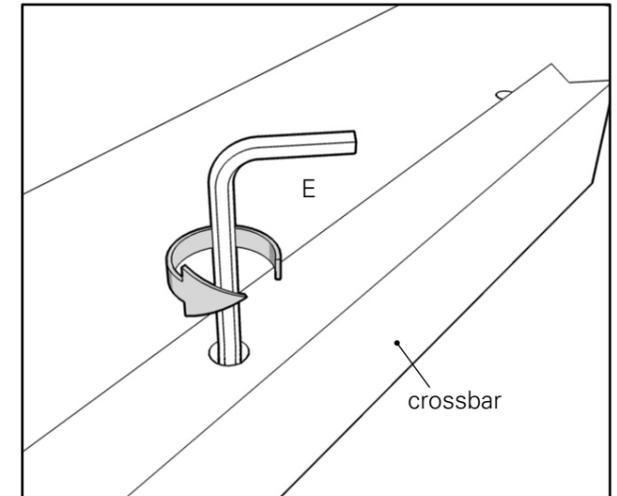

1. Open top of carton fully and turn upside down.

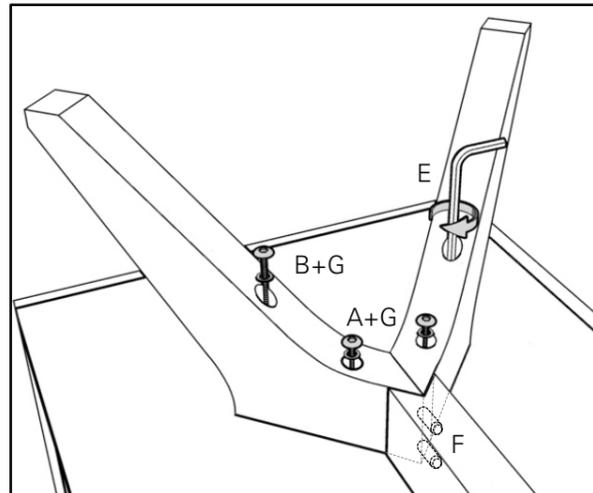

2. Remove all packaging.

3. Open door and remove inner carton containing legs and fittings.

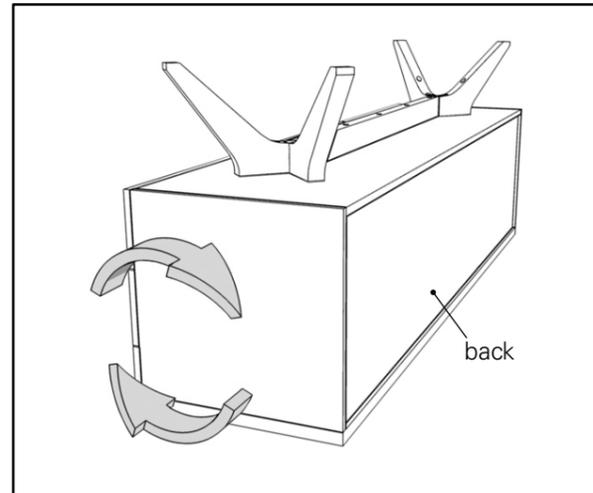

4. Loosen bolts in crossbar with Allen key (E) to allow movement when fitting the legs to each end.

5. Insert dowels (F) into leg and locate into end of crossbar.

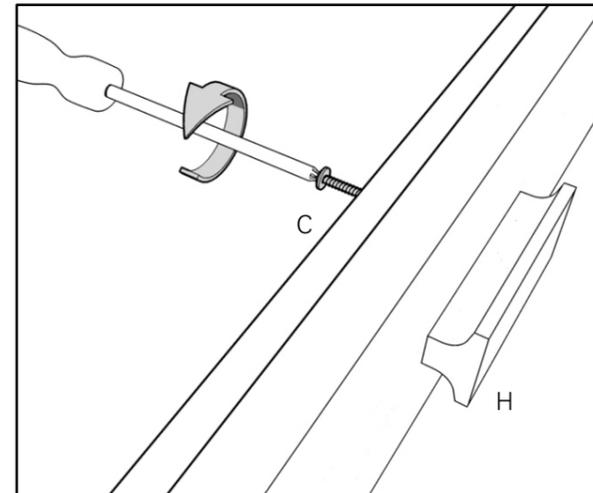

Loosely locate all bolts properly (A,B and washers G).

Fully tighten **ALL** bolts with Allen key (E).

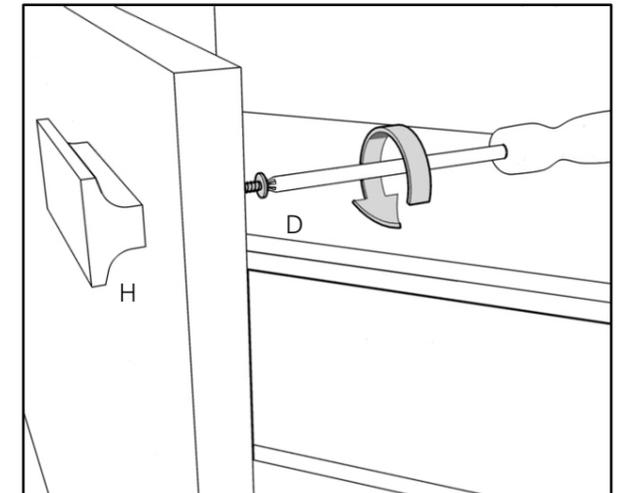

6. Once legs and crossbar are securely attached, turn unit onto feet.

NOTE: Turn as shown to prevent doors and drawers from opening.

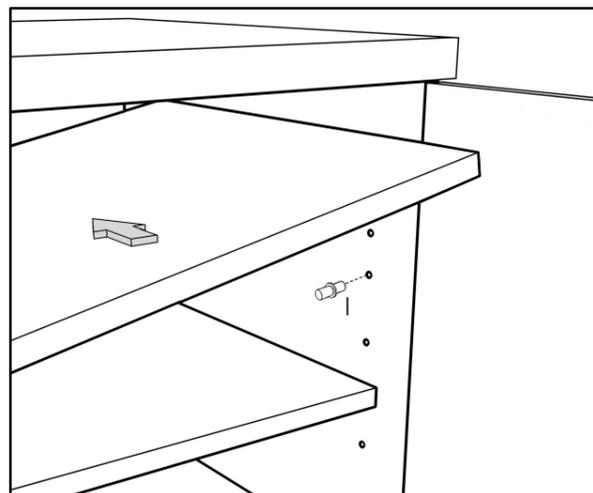

7. Attach drawer handles (H) using screws (C).

Fully tighten when straight.

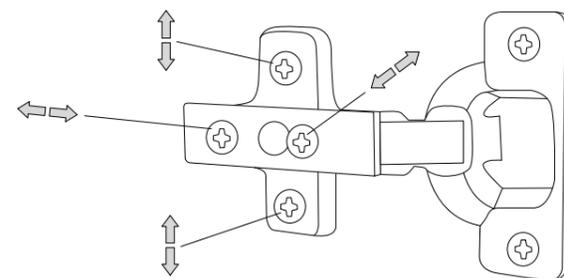

8. Attach door handles (H) using screws (D).

Fully tighten when straight.

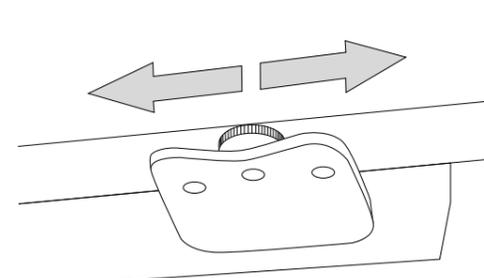

9. Remove shelves and insert shelf supports (I) at desired height. Re-insert shelves to rest on supports.

Adjustments

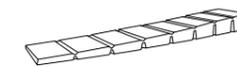

Fully adjustable door hinges help to maintain equal spacing and correct alignment of doors if required.

Height of drawers can be adjusted by turning wheel mechanism found on each drawer slide.

If inner door/drawer bumpers (J) are required to silence closing, simply peel off and apply to inside face of door/drawer.

Foot wedge (K) will correct uneven floors which can affect accurate alignment of doors and drawers. Insert under foot and snap off excess at the desired step.
