# FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful furniture that lasts through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

## History revisited

The Navy Officer series was first introduced in 1948. With its long history, this humble but proud chair is an unimpeachable symbol of no-nonsense American ingenuity.

Jasper Morrison has carefully refined this iconic collection making it relevant for today, and tomorrow, for any setting where an extra level of comfort and durability is demanded.

In our factory in Hanover, PA, our craftsmen build the Navy chairs by hand from recycled aluminum, following our unique 77-step process. Originally developed to meet the stringent requirements of the US Navy in the 1940's, the frames are so strong we guarantee them for life.
