

How Emeco products contribute to the WELL Building Standard®

The [WELL Building Standard®](#) is one of the leading tools for advancing health and wellbeing in buildings globally, measuring the wholistic impact of all materials and design of a building on both the environment and the wellbeing of human use across a series of metrics, structured in ten categories, or concepts. This document outlines how Emeco products contribute to the WELL v2 Certification and may be used as supporting documentation for the credits listed below.

CONCEPT: MATERIALS

This category addresses the selection of materials and finishes in building interiors. Furniture materials and finishes can be chosen to meet criteria related to sustainability, low toxicity, and environmental responsibility.

WELL v2 Feature:	X07 Material Transparency	Applicable Emeco products:
Part 1:	Select Products With Disclosed Ingredients	All products with a published HPD*
Part 2:	Select Products With Enhanced Ingredient Disclosure	All products with a published HPD*
Part 3:	Select Products With Third-Party Verified Ingredients	All products with a published HPD*
Reference:	Health Product Declarations (HPD), disclosed to 1000 ppm are published online in our Downloads library .	

* HPDs are available for all Emeco products except Alfi Work, Alfi Aluminum, Navy Officer, Navy Officer semi-upholstered, Parrish tables, Run accessories, Run cushions, Run shelf and all seat pads.

CONCEPT: MATERIALS

This category addresses the selection of materials and finishes in building interiors. Furniture materials and finishes can be chosen to meet criteria related to sustainability, low toxicity, and environmental responsibility.

WELL v2 Feature:	X08 Material Optimization	Applicable Emeco products:
Part 1:	Select Materials With Enhanced Chemical Restrictions	All
Reference:	All products are free of compounds listed in the Living Building Challenge's Red List v.4.0.	

**CONCEPT: INNOVATION**

This category paves the way for projects to develop unique strategies for creating healthier environments, including carbon disclosure and reduction to reduce emissions from greenhouse gases to slow the global rise in temperature.

WELL v2 Feature:	I06 Carbon Disclosure and Reduction	Applicable Emeco products:
Part 1:	Carbon Inventory	All products with a published carbon footprint declaration.
Reference:	Carbon footprint declarations are published online in our Downloads library .	

Emeco products may also contribute to WELL Concepts Air, Light and Comfort.

**CONCEPT: AIR**

Emeco products are VOC certified Clean Air Gold or Silver which to help and sure acceptable air quality levels that contribute to the health and occupant well-being.

**CONCEPT: LIGHT**

Furniture placement and design can affect access to natural light, which is an essential factor in human well-being. Properly designed furniture layouts can maximize natural light exposure and minimize glare.

**CONCEPT: THERMAL COMFORT**

Furniture selection plays a significant role in providing ergonomic and comfortable seating and workspaces, which can contribute to occupant well-being. Points may be awarded for the use of ergonomically designed furniture and adjustable seating.
