

NAVY OFFICER by JASPER MORRISON

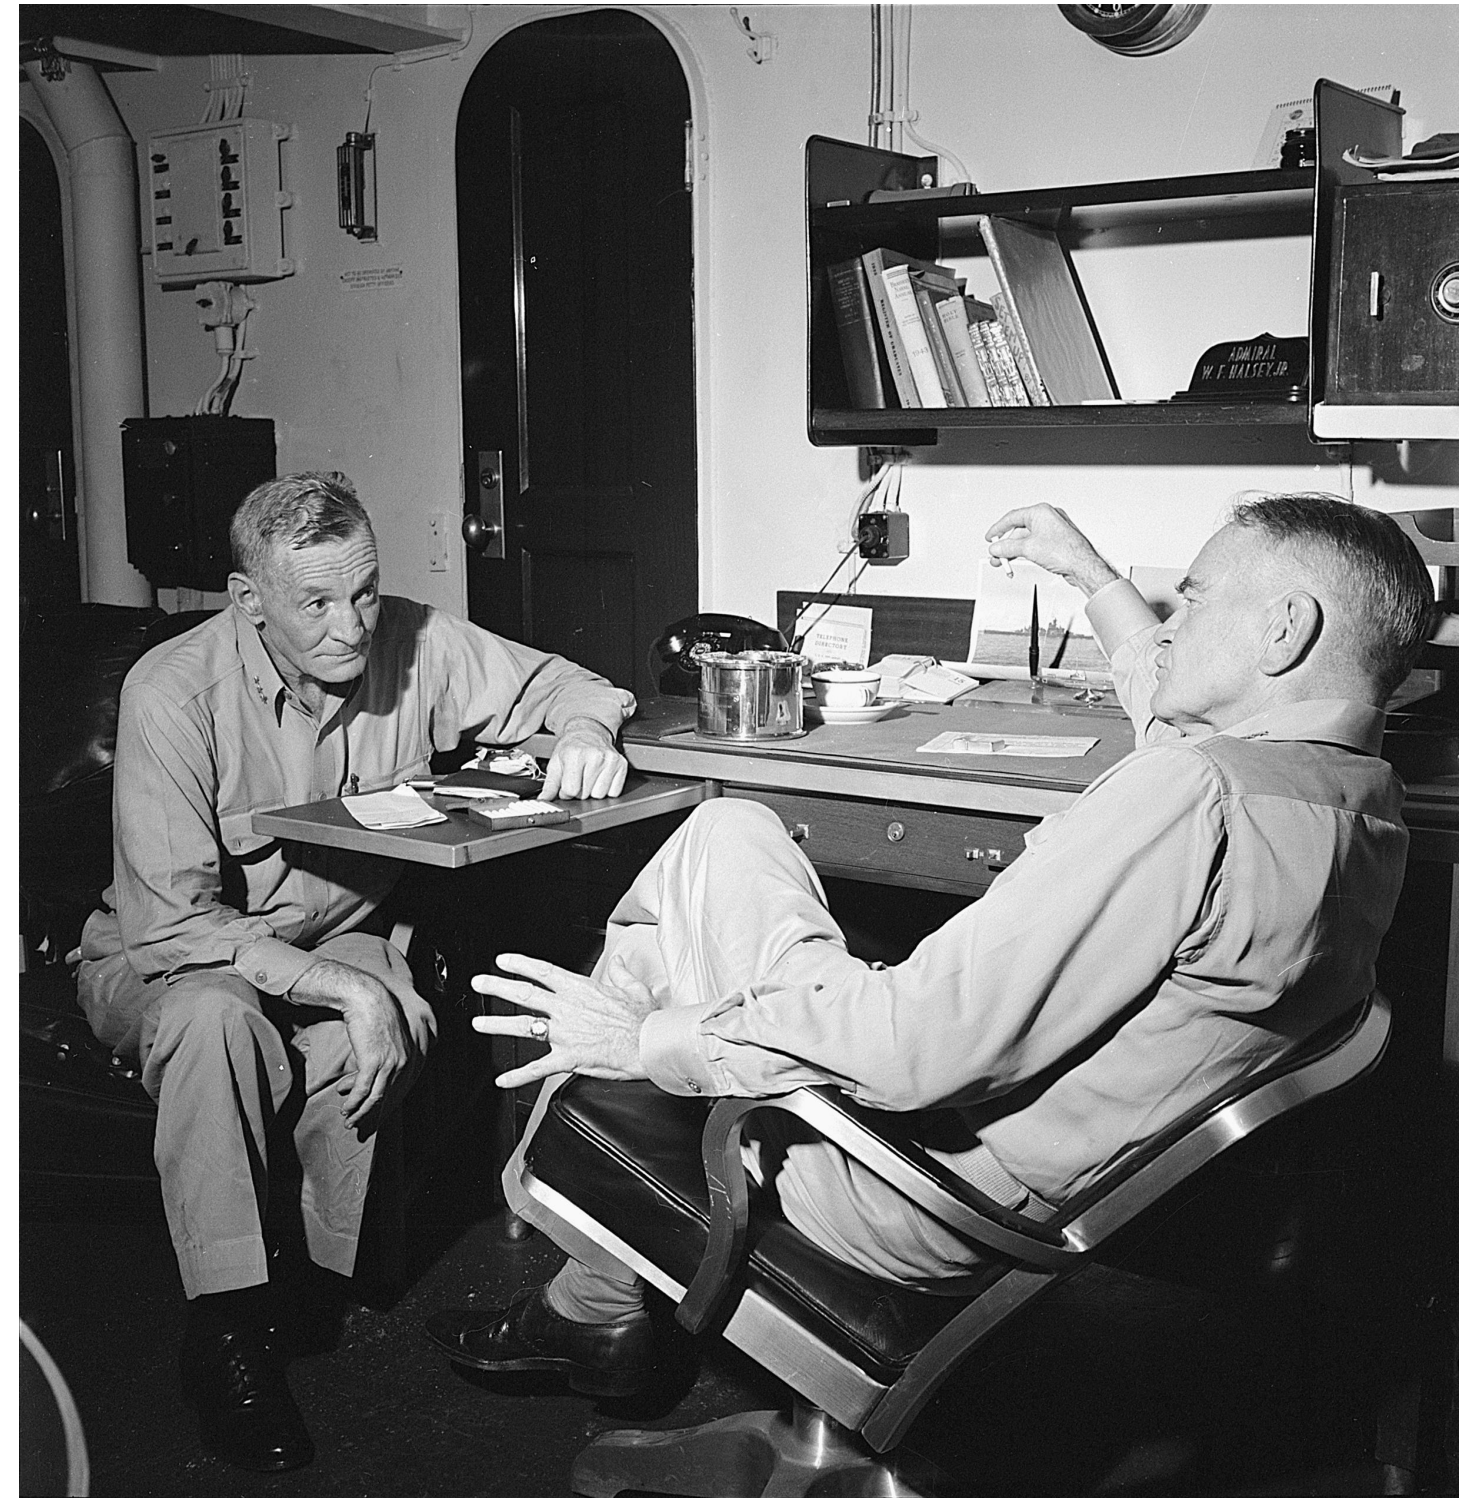

emeco

FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful furniture that lasts through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

History revisited.

The Navy Officer series was first introduced in 1948. With its long history, this humble but proud chair is an unimpeachable symbol of no-nonsense American ingenuity.

Jasper Morrison has carefully refined this iconic collection making it relevant for today, and tomorrow, for any setting where an extra level of comfort and durability is demanded.

Emeco's signature hand brushed, clear anodized finish and powder coat finishes are all-weather. With outdoor approved upholstery, Navy Officer side chairs and stools are perfect company for outdoor.

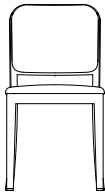

All Navy Officer chairs and stools are available in Emeco's signature hand brushed, clear anodized finish or a black powder coat finish as standard. Additional powder coat colors for the frame are offered from Emeco's in-house selection as per the listed prices for black powder coated frames. No MOQ. Upholstery offered in a selection of Kvadrat textiles and Spinneybeck leather as well as COM/COL.
