

Jace Coffee Table Silk Grey Marble

A rounded marble top on a base that swirls with burl grain. Soft Silk Grey marble meets a warm, mid-tone burl wood base on the Jace coffee table, a mixed-material pairing that feels considered from the first look. The organic base reads differently from every angle, while a rounded top with a bullnose edge keeps things soft and practical in a living room. Just easy curves, all the way around.

- Organic Burl Base: A sculptural base in warm, mid-tone burl wood reads differently from every angle, giving the coffee table an organic, design-forward presence.
- Silk Grey Marble Top: A Silk Grey marble top brings soft, natural veining and a cool tone that plays warmly against the mid-tone brown burl of the base.
- Soft Bullnose Edge: A rounded top with a bullnose edge softens every corner, an approachable, practical shape that suits a busy living room and family life.
- Stone Meets Burl: Cool marble and warm burl wood pair into a layered, mixed-material look, balancing a smooth stone surface with the depth of organic grain.
