

TIERRA 470 pendant lamp *by* HÉCTOR SERRANO
Ref. 20400

The TIERRA collection of pendant lights designed by Héctor Serrano combines the beauty of nature with the innovation of 3D printing. The shade is made of PLA (a bioplastic of vegetable origin) mixed with recycled pine cellulose. This gives it a random and imperfect texture for an artisan look. The shapes in this collection evoke the warmth of beehives in a subtle and synthetic way. When lit, the designs transform into luminous sculptures thanks to their translucency. The TIERRA 470 light can be placed individually or combined with the other models in the collection to create compositions that fill the space with light and presence.

General characteristics

Fixation	Ceiling
Type	II
IP	20
voltage	100V-240V
Hertz	50/60Hz
Cable length	2000 mm
Max. Power	20W

Material

Body/Structure	Steel
Screen	PLA + Pine Cellulose

Finish

Body/Structure	Black
Screen	Natural

Lighting characteristics

Light source included	No
Light source	E27
Recommended bulb	G120 GLOBO
Light direction	Ambient lighting
