

# DEMI VOLÉE

Odo Fioravanti

Volée is a Led luminaire of the latest generation, in which the formal research is combined with technological innovation. Featured by an essential design, Volée switches on with an almost tennis-style gesture: a simple wave of the hand under the head of this lamp activates an electronic device that switches the light on or off without any contact. A touch sensor over the head allows the flow of light to be regulated to four different levels of intensity (40%, 60%, 100%, 0%). A Time Out system automatically switches the lamp off after it has been on for 5 hours. The tension for the hidden-spring balancing mechanisms is provided by steel wires that allow to orientate the light emission with a fluid movement. Volée is suitable for every kind of environment, both modern and traditional.

# DEMI VOLÉE - WHITE

---

## TECHNICAL SHEET

Certification	CLASS III,ETL
Material	Metal,Polymer
Switching	Dimmerable,Switch
Emission	Adjustable light direction
Light Source	Integrated LED
Luminous flux	800 Lm
Color temperature	2700 K
TYP CRI	>90
IP	20
