

CADIZ

LOW ARMCHAIR

DESIGN BY ANTOINE LESUR

ITEM 8704

The combination of aluminium and outdoor fabric popularized by Fermob more than 22 years ago is back on the scene with the new Cadiz seats. This collection offers a generous, unusual range of seats, with no fewer than 5 models for all dining requirements! Chair, armchair, low armchair and stools in 2 heights: 75 cm for a drink at the bar and 65 cm with armrest - the high armchair, a new product in the Fermob catalogue - for comfort during meals.

This collection has many qualities. The aluminium structure makes it light and manoeuvrable: you can move Cadiz out onto your terrace when you have guests for dinner. The break in the lines of the backrest and the seat brings a touch of modernity, the sign of an unusual design. The fabric covering the seats and backrests provides comfort and flexibility. The armrests are hydroformed: this is an advanced technology deriving from the aerospace industry used to transform a straight tube into a slender, curved armrest in 17 successive steps. A real technical feat! The environmental aspect has also been taken into account. The product is light, the material optimized, and less space is required. A contemporary look that goes with all terraces and styles. Cadiz is happy indoors or out and can be put out or stacked in all seasons.

You only have to choose the colour!

TESTING STANDARDS - Upon request

NF EN 581-1 (all products), NF EN 581-2 (seats)

WARRANTY

	IN ALUMINUM	IN STEEL
STRUCTURAL	3 YEARS	2 YEARS
FINISH	2 YEARS	1 YEAR

TECHNICAL FEATURE - STRUCTURE
