Leather

The Embassy Sofa conveys a classic, mid-century style with tailored proportions and refined details. It features a button-tufted, tight back design with piping details throughout, and seat cushions filled with luxurious synthetic-down. The frame is supported by a recessed, solid-wood base. Available in two classic leathers, chosen for their unique grain characteristics that will age beautifully and develop a rich, natural patina over time. The Embassy is also available as a chair. Our leather hides are carefully selected for their raw, natural surface characteristics which make each piece unique.

Design Trade Professionals: We aim to keep our designs in stock and ready to ship quickly for projects on a tight timeline. Designs may be customized with COM and alternate finishes (minimum quantities may apply). Visit gusmodern.com for more information about our Trade & Contract programs.

Embassy Sofa

- Leather is top grain, aniline-dyed.
- Our leathers may have distinct surface characteristics, natural markings, grain pattern and colour variations which differ from hide to hide and from one product to another, making each leather product unique.
- Surface scratches and wear marks on leather are normal and to be expected. Over time they will contribute to the unique personality, patina and visual charm of the design. If desired, scratches and wear marks may be minimized with the use of leather conditioner.
- With all leather products, some stretching over time is normal. This "working in" of the leather only adds to the comfort, softness and character of the design.
- Tight back cushions are button tufted and constructed from medium density polyurethane foam covered in a Dacron wrap.
- Seat cushions are medium density polyurethane foam wrapped with synthetic-down envelope.
- Legs have Walnut Stain Finish.
- Plastic bumpers on all legs to prevent floor damage.
- No-Sag, sinuous spring system.
- All joints have been stress tested.
- Manufactured to meet California TB117-2013 fire safety standards without the use of flame retardant additives in the upholstery foam.
- Matches perfectly with the Embassy Chair.
