

#### CARE INSTRUCTIONS - WOOD

For dusting and light cleaning of the wooden surface use a soft, dry cloth. For further cleaning, use a soft cloth that is firmly wrung in clean water for gently wiping the surface, and then immediately use a dry cloth to wipe the surface again.

Do not use materials for maintenance that:

- Contain abrasive agents.
- Are basic, acidiferous or organic.

For the best maintenance of the product, protect it against sunlight and heat, and try to keep it away from moisture, grease and other dirt. Furthermore, protect the surfaces against sharp objects and others that might cause scratches.

A hot object at all time must have a heat proof mat or trivet underneath, otherwise it will damage the lacquered surface.

#### DAILY CLEANING - MARBLE

For marble maintenance, see the included marble instructions sheet.

#### REPAIRS AND MAINTENANCE

Strongly coloured fluids, like red wine and fruit juice need to be dried up immediately because they might stain the table. Deep dents and scratches in the wood can in most cases be repaired. These type of repairs should always be done by a professional carpenter.
