DURATION

1-2 Hours

TOOLS & SUPPLIES

Wire strippers

Pliers

Screwdriver

9/64" Drill Bit

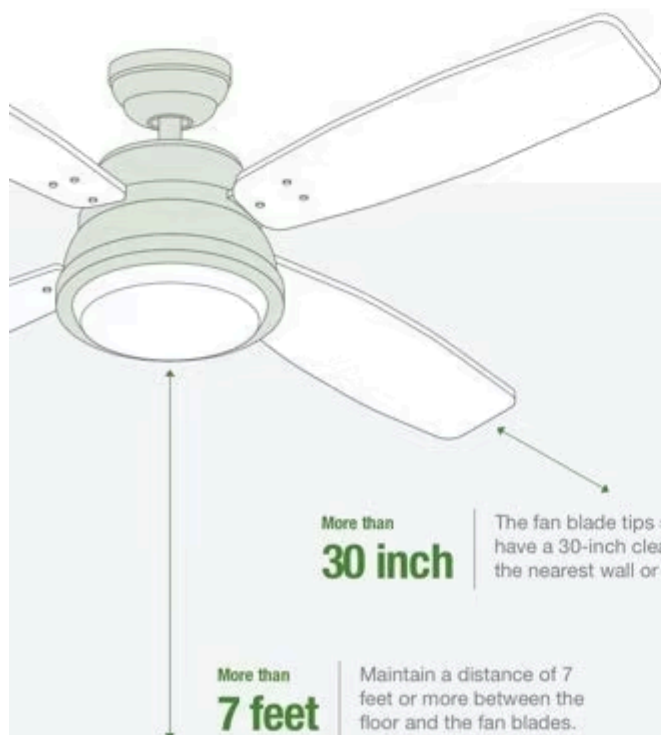

Wire Tester

Electric drill

Ladder

Hunter

GETTING STARTED

Turn off Power

Shut off power at the circuit breaker and light switch before starting and leave it off until the project is complete.

Hunter

1

Uninstall and Remove an Existing Fixture

SWITCH OFF

Turn off power at the wall light switch.

VERIFY

Use a circuit tester to verify the power is off.

REMOVE

Disconnect the existing fixture's wires and screws.

After uninstalling the existing fixture, verify that the electrical box is ceiling fan-rated. The ceiling fan box should be able to support 70 pounds.

7

Use the Remote Controls

Hunter offers a variety of controls that make it simple to adjust your fan's features. Most
remotes and wall controls are already pre-paired to the ceiling fan.

**Wall Control**

Installed at the wall switch to be
easily found and used

**Remote Control**

Convenient control of your fan
from anywhere in the room.

**Smart Home**

Use your smart device to control
the fan with voice commands or
the tap of a button

Visit hunterfan.com to find your perfect ceiling fan.
