

How to Install a Ceiling Fan

Hunter

While installing or replacing a ceiling fan might seem complicated, ceiling fan installation is a relatively straightforward process. With a few basic tools and materials, you can learn how to hang a ceiling fan in just a few steps. Refer to your owner's manual for detailed installation instructions.

TOOL & SUPPLIES

DURATION
1-2 HOURS

Wire pliers
Pliers
Screwdriver
3/16" x 1/4" x 3/4"

Wire Tester
Electric drill
Ladder

GETTING STARTED

Max Blade 30 inch
Max Blade 7 feet

The fan blades should hang at least 7 feet from the ground and be at least 7 feet from the nearest wall or obstruction.

Turn off Power
Check off power at the circuit breaker and turn off power before starting and turn it off and the wiring is complete.

1 Uninstall and Remove an Existing Fixture

SWITCH OFF
Turn off power at the wall switch.

VERIFY
Use a non-contact voltage tester to verify the power is off.

REMOVE
Remove the existing fixture and wiring.

After uninstalling the existing fixture, verify that the electrical box is ceiling fan rated. The ceiling fan box should be able to support 75 pounds.

2 Install the Ceiling Bracket

For downrod fans
For low profile fans

3 Wire the Ceiling Fan

There are three main wiring methods for ceiling fans: standard pull-chain, pre-installed receiver, and remote receiver. Refer to your owner's manual for detailed wiring instructions.

Standard Pull-Chain
Pre-Installed Receiver
Remote Receiver

WARNING: Ceiling fans should be installed only in locations with proper ventilation and not in areas with high humidity or moisture.

4 Finish Installing the Canopy or Motor Housing

From with a Downrod
Motor Housing
Low Profile Ceiling Fan

5 Install the Blades

There are three common blade installation methods for Hunter ceiling fans:

Ceiling Fans with Blade Irons
Ceiling Fans with Mid-Body Blade
Snap on

6 Install the Lighting

Refer to your owner's manual for lighting instructions.

Multi Arm
Integrated
Bowl
Globe

7 Use the Remote Controls

Hunter offers a variety of controls that make it simple to adjust your fan's features. Most remotes and wall controls are already pre-paired to the ceiling fan.

Wall Control
Remote Control
Smart Home

Installed at the top of the fan, the wall control is the easiest to use and most common.

Remotes are pre-paired to your fan from anywhere in the room.

Use your smart home system to control the fan with voice commands or through a smart app.

Visit hunterfan.com to find your perfect ceiling fan.
