

BENNINGTON Sconce

The Bennington Sconce is a study in linear, cylindrical minimalism—elegantly composed of solid oak or walnut, integrated LED technology, and meticulously crafted metal components. Available in lengths from 3 to 6 feet, the fixture offers a wide range of beam angles and can be tailored to suit a variety of applications: from highlighting artwork or mirrors to delivering soft, indirect illumination across a space. Further customization is possible with adjustable standoff depths, allowing precise control over the light's cast and proximity to the surface.
