

PASTOE

SM05 Wire Dining Chair

CEES BRAAKMAN

The Wire chair combines an elegant frame with a minimalist design, striking the perfect balance between functionality and style. Its light, open structure creates a transparent look, while the ergonomically shaped seat offers excellent comfort. As Pastoe's head designer, Braakman drew inspiration from international design movements. In his mission to create accessible furniture for a wide audience, he created various designs in wire steel—a material that was cost-effective to produce at the time. A true masterpiece of craftsmanship and innovation, the Wire chair remains beloved among design enthusiasts to this day.
