TE06 Dining Table

MARTIN VISSER

The TE06 dining table, designed by Martin Visser in 1960, is a timeless design with a contemporary appeal. It embodies Visser's design philosophy, centered on minimalism, functionality, and the use of durable materials. The table's slender, three-legged base offers excellent stability while creating a visually light foundation, perfectly balanced with the round tabletop. With its refined design and high-quality finish, the TE06 is not only functional but also a striking statement piece for any dining room.
