Wire Bar Stool

CEES BRAAKMAN

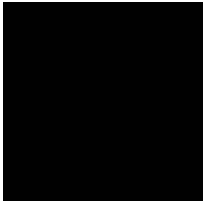

The Wire Bar Stool combines a light, airy appearance with robust sturdiness. The minimalist wire steel frame creates an open, transparent look, while the compact form and gently curved seat deliver surprising comfort. The low version of the Wire bar stool is designed to perfectly match the height of standard kitchen counters, integrating it seamlessly into kitchens, kitchen islands, and showrooms. The high version is intended for use at bar tables and tall counters, fitting into a wide variety of settings, from hospitality venues to meeting rooms and reception areas. Cees Braakman's design reflects a time when Dutch design was deeply influenced by international movements and innovative production techniques. By working with wire steel, he was able to create a seating solution that is durable, refined, and versatile. The Wire Bar Stool is therefore not only a practical choice but also a subtle style statement in any interior.
