

GEODE MIRROR, BLACK AND GOLD

Matte

Exhibiting the characteristics of a real piece of glittering stone, the Geode Gold Mirror is a trickster, as it is made of composite in a mix of matte black and gold finishes rather than rock that has developed its sparkle over centuries underground. We cast the gold and black decorative mirror with organic lines to mimic the asymmetrical profile for which real geodes are known. For a cooler color palette, we also offer the Geode in a black and silver combination. These oval mirrors reflect the ethos that Phillips Collection personifies: modern organic.
