

CHULETA MIRROR

Chamcha Wood, SM

The perfect example of how we use even the smallest pieces of natural wood we source, the Small Chuleta Mirror is a sculptural piece created from a freeform end-cut of chamcha wood that was hollowed out and fashioned into a mirror. Though many product designers would see this as a useless castaway, we see it as building a block that creates dynamic elements for interiors. These mirrors personify the modern organic ethos for which Phillips Collection is renowned.
