

GEOMETRY WOOD WALL TILES

Chamcha Wood, Natural, Black

Playing around with shapes is one of the main implements in our tool kit at Phillips Collection. In combining the deepest black and natural wood on slant, as we have with our Geometry Natural Right Wall Tile, we've created a sophisticated profile that brings organic warmth and contemporary cleanness to a space. The surface variations of the woodgrain also bring texture into a room. Hang these singly or combine them for a gallery wall installation for greater punch. We have a wide array of shapes in coffee tables, console tables, and side tables in this collection, as well as tables in a gray finish, and stools and left-slanting wall tiles. Each of these reflects the ethos that we personify: modern organic.
