

MORPHIC PETRIFIED MIRROR

Point, Black Frame

Sculptural in form and elemental in spirit, the Morhic Petrified Mirrors in Black capture the organic beauty of nature through a lens of refined artistry. Each frame is meticulously composed of hand-cut petrified wood, polished to reveal darkened hues and subtle mineral veining. The fluid silhouettes, ranging from softly rounded to strikingly asymmetrical, echo the rhythms of the natural world, transforming each mirror into a statement of movement and materiality.
