

WAVES BOWL

Sandstone, SM

The design of the Small Waves Bowl was inspired by the rippling patterns the wind creates on the sand. Each of the pieces in our Waves family of products combines organic inspiration with high technology. Because this decorative bowl is made of composite, it is long-lasting and lightweight. The fact that the off-white bowl takes on the spirit of the stone, illustrates how contemporary materials can feel natural. This decorative accessory definitively reflects the Phillips Collection ethos of modern organic. We offer a number of tabletop accessories and garden planters in this family of products.
