

STACKED PEBBLE PETRIFIED MIRROR

Mixed

Nature finds its rhythm in the Stacked Pebble Petrified Mirror. It is a masterclass in contrast, with smoothly polished pieces of genuine petrified wood arranged in a rhythmic mosaic. The organic shapes, stacked like river stones, tell a story of transformation as once living trees turned to stone through nature's patient artistry. Each piece reveals its own strata of black, ivory, and taupe, creating a rich visual texture that bridges the past and present with natural elegance.
