

A Warranty that Fits And a ten-year one at that

We are fully confident in our work, which is why our products newly come with a premium ten-year warranty. This is because we thoroughly supervise the manufacturing process in our Bystřice pod Hostýnem factory. Everything starts with our CEO Milan Dostálík selecting the highest possible quality from local sources. Once we bring the wood to our factory, we store it in an area where the material reaches the proper humidity level.

It takes time, but we are not in a hurry.

Once the wood has reached the required humidity, we put it in the hands of our experienced benders, grinders and varnishers. The processed material then spends weeks to months within the bowels of the factory, resting and maturing. The product itself only leaves the factory fully finished and perfectly prepared for the customer after having gone through the hands of at least twenty experienced workers.

Every single product we work on matters to us.

In these hectic times, we are giving you something that has a lasting value and lasts longer than ten years. It will last your entire life and will even serve the generations after you. We don't do fast-moving goods, we are Ton. Hand-crafted for generations.

The ten-year warranty does not apply to parts supplied to us from external suppliers, such as the canes or drawer housings for tables For more information [click here](#).
