PEARL SCNCE (120V) | INSTALLATION

Note: Please contact a licensed electrician.

01. Unscrew the glass diffuser (A) from the main sconce base (B) in a counter clockwise direction. Then gently slide it out, as there is a very tight clearance.

PEARL SCONCE (120V) | INSTALLATION

Note: Please contact a licensed electrician.

02. Take the LED driver (C), and connect the lead wires with the provided 2-port wago (D) from the J-box (E).
03. Optional, make the dimming wire connection (F) with the provided 2-port wago.
04. Fit the LED driver inside the J-box and tuck in the connected wires.

05. Bring the crossbar (F) up to the J-box (E), and make the ground wire connection using the provided 2-port wago (G).
06. Pull the low voltage wires through the cent hole of the crossbar. Then tuck in all the wires into the J-box, and secure the crossbar to J-box with two 8-32 screws (H).
