

Vent Pendant

Daniel Schofield | 2025

The Vent Pendant draws on the interplay between form and function, where two elemental shapes converge to sculpt light in dual directions. Crafted in cast aluminium or bronze, a conical shade delivers a focused beam downwards, while a triangular body allows an ambient glow to escape upwards, gently illuminating the surface of the metal. By pushing light back onto itself, the design quietly reveals the depth and texture of its material. Whether suspended alone or in a series, the Vent Pendant lends a considered presence to any interior.
