We recommend installation of our Pivot Sconce by a professional electrician. Turn off electrical power before beginning installation and use caution while installing.

Your Pivot Sconce kit consists of **(6)** individual parts:

**(1) Pivot Sconce**

**(2) Mounting Screws**

**(1) Light Bulb**

**(2) Wire Nuts**

**Included with your Pivot Sconce is an LED 7 watt light bulb.**

**The bulb is a warm white (2700K) G25 and delivers 800 lumens.**

**The bulb is JA8 certified and has a 15,000 hr lifetime.**

**G25 bulb recommended. 60W Max**

1. Your Pivot Sconce has been preadjusted to have the proper tension in the electrical cord. If desired, tension can be changed by adjusting Set Screw on Cord Grip.

2. Secure Rod into hole in Bracket.

3. Connect Electrical Cord to power supply with Wire Nuts. Tuck wires into junction box.

4. Thread Mounting Screws through Wall Plate into Junction Box/Mud Ring. Tighten Mounting Screws so that Wall Plate sits flush with wall.

5. Insert Light Bulb into fixture, turn on and enjoy!

 **CAUTION: Before starting, turn off power at main circuit power.**
