Gesture assembly tutorial

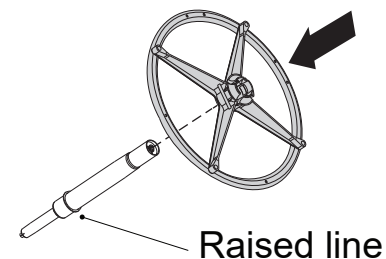

For Chair Assembly

1

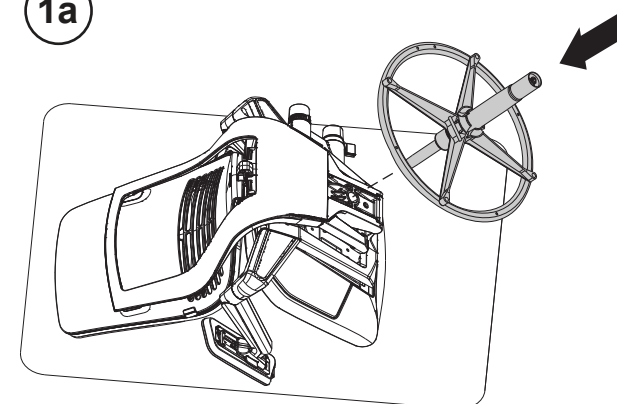

For Stool Assembly

1

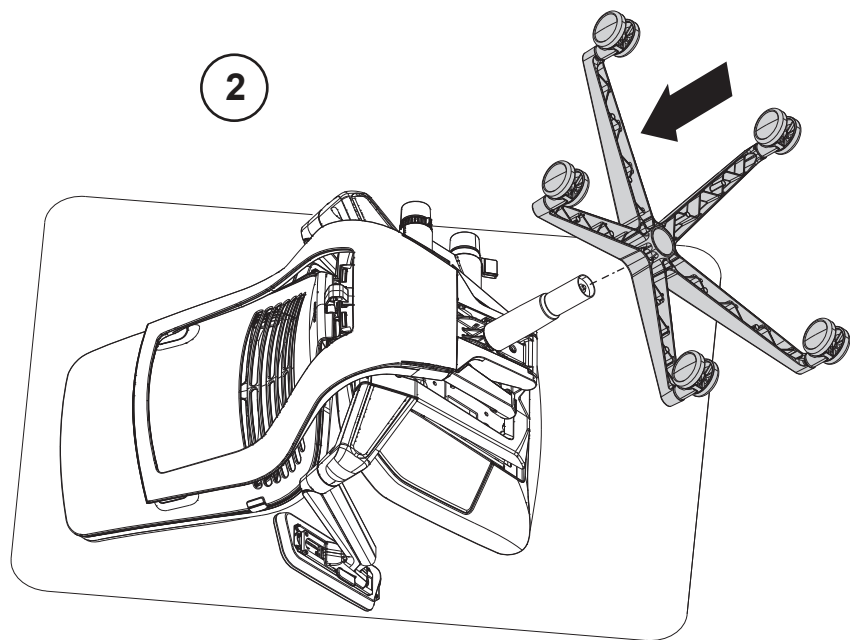

1a

For Stools, slide the stool foot ring onto the cylinder up to the raised line and turn the foot ring clockwise to tighten. Insert the cylinder into the base.

Note: To adjust the foot ring height, turn the foot ring counterclockwise to loosen from the cylinder, and re-tighten at the desired height by turning it clockwise.

Note: Sit in chair or stool to securely lock components together and complete assembly
