Press Release

NEW COLLECTION

MELT PENDANTS

Tom Dixon.

With MELT, our experiments in the technologically advanced field of vacuum metallisation takes on a new twist. MELT is a distorted lighting globe born from our collaboration with Swedish radical design collective FRONT.

The light bouncing and reflecting around the uneven surfaces creates a dramatic melting hot blown glass effect. MELT is translucent when on and mirror finish when off. Its internal luminosity is visible in full daylight.

At night, it emits an attractive, mildly hallucinogenic light, akin to recent Hubble Telescope images of the cosmos. Available in 30cm and 50cm, in copper, gold and silver.

About Tom Dixon

Tom Dixon is on a mission to design, illuminate and furnish the future with innovative lighting, furniture and accessories of longevity, simplicity and a materiality inspired by Britain's unique heritage.
