1

1 Remove the fixture screws located on the top and bottom of the fixture base using a screw driver, then remove the mounting plate from the fixture base.

2 Connect the fixture to suitable ground in accordance with local electrical codes.

3 Connect the white driver wire to the neutral power line wire with a wire nut.

4 Connect the black driver wire to the hot power line wire with a wire nut.

5 Properly place the driver, all wires, and wire nut connections into the electrical box, then install the mounting plate onto the electrical box with the two #8-32 screws provided.

6 Connect the black driver wire to the black fixture wire with a wire nut.

7 Connect the red driver wire to the red fixture wire with a wire nut.

8 Mount the fixture back onto the mounting plate and reinstall fixture screws (reversal of step 1).
