

HUDSON VALLEY LIGHTING GROUP

Care & Cleaning Instructions

ALWAYS turn off and/or unplug fixtures prior to cleaning.

Portable Lamps: Lamps should be cleaned with a dry, soft cloth.

Finishes: To avoid damage to the finish do not use polish, abrasive cleaners, or harsh chemicals.

Aged Brass (AGB) fixtures: should be handled with clean hands or gloves to avoid uneven patina.

Fabric Shades: Shades can be gently dusted with a soft-bristle brush vacuum attachment., or manually with a dry, clean, soft-bristle brush. Dust in long, smooth strokes from the top of the shade to the bottom. Remember to clean the inside of the lampshade as well. Do not use a brush or a vacuum attachment if there are any rips or tears in the fabric.

Acrylic Diffusers: Use only water or cleaners specifically formulated for cleaning plastics. Always use a soft, damp cloth to avoid scratching the acrylic. Do not use ammonia-based cleaners (e.g. Windex®), abrasives, or chemicals, as they can damage the fixture.

Replacement Lightbulbs: Only use HVLG suggested bulb sizes to ensure proper functioning and extend fixture longevity. Go to HVLGroup.com to find your bulb size and view product details and specifications.

Using any advised against cleaning methods will void the product's warranty.
