1. Carefully remove all parts from the box.
2. Remove the collar loop (C) from the chain (F) by unscrewing the quick link (G).
3. A 1/4 IPS pipe must be installed through the junction box and secured to a structural member of the building. This item must hang independently of the junction box. Then install the threaded nipple (B) into the 1/4 IPS PIPE.
4. Install the canopy (D) to collar loop (C) and secure with collar ring (E). If needed, adjust collar loop (C) height by loosening hex nuts and screwing collar loop (C) up or down then re-secure.
5. With the fixture desired height, shorten the chain (F) as needed using the chain pliers (not included).
6. Open the chain quick link (G), then attach the chain quick link (G) to the collar loop (C). Secure the chain quick link (G).
7. Open the chain quick link (G) from the opposite side then attach to the fixture loop (H). Secure the chain quick link (G).
8. Gently set the fixture arms (I) to the center plate (J) and secure with the washer (L) and lock nut (M). Check that the arms are spaced evenly before final tightening.
9. Connect the fixture arms (I) ribbed wire (no markings) to the fixture ribbed wire (no markings) and 4" connect ribbed wire (no markings) with wire nut (N) and wrap the connection with the electrical tape (not included) as shown in the diagram 1.
10. Connect the fixture arms (I) smooth wire (with markings) to the fixture smooth wire (with markings) and 4" connect smooth wire (with markings) with wire nut (N) and wrap the connection with the electrical tape (not included) as shown in the diagram 1.
11. Thread the hub (Z) to the hickey (K).

12. Gently set the fixture arms (O) to the center plate (P) and secure with the washer (L) and lock nut (M). Check that the arms are spaced evenly before final tightening.
13. Connect the fixture arms (O) ribbed wire (no markings) to the connect ribbed wire (no markings) with wire nut (N) and wrap the connection with the electrical tape (not included) as shown in the diagram 2.
14. Connect the fixture arms (O) smooth wire (with markings) to the connect smooth wire (with markings) with wire nut (N) and wrap the connection with the electrical tape (not included) as shown in the diagram 2.
15. Install the metal bowl (Q) to the threaded nipple (W) and secure with the hex nut (R).
16. Install the rubber washers (S) to either side of the glass bowl (T) and secure to the threaded nipple (W) with the finial (U).
17. Weave the fixture wires and safety cable through the chain (F).
18. When you reach the canopy (D) and collar loop (C), measure the wires then cut, be certain to leave enough length to connect the wires in the junction box.
19. Strip the insulation on the fixture wires about 5/8".
20. Loosen the collar ring (E) and let the canopy (D) slip down the chain (G) carefully.
21. Twist the fixture wires and safety cable together and push through the center hole of the collar loop (C).
22. Run safety cable through junction box and install to structural member of the building. Secure using cable lock nut as shown in figure.
23. Connect the fixture ground wire to the ground wire in the junction box using the wire nut (A). IT IS IMPERATIVE THAT THIS FIXTURE BE GROUNDED.
