Wire Ø18 Portable Lamp

LIGHTING

VERPAN

VERPAN Introduces the Wire Ø18 Portable Lamp

Known for its striking open wire frame and luminous dome-like shade, the Wire Lamp has long stood out among Verner Panton's lighting design. Designed in 1972, its unique blend of industrial materials and poetic form made it an instant classic.

Over fifty years on, VERPAN brings this unmistakable silhouette into every aspect of contemporary life with Wire Ø18 Portable Lamp – a compact, cordless edition that captures the original's sculptural spirit, adding mobility, versatility, and a soft, ambient glow, wherever it's placed.

Wire Portable Lamp retains all the essential elements that have defined the Wire Lamp family: a glossy chrome-plated stainless-steel base constructed from delicate, concentric rings and a perfectly balanced, opal hemisphere that softly diffuses light. The result is a lamp that feels as light and expressive as it is essentially functional.

Designed for flexibility, the Wire Portable Lamp is IP44 tested, making it suitable for outdoor use, be it for a dinner party or evening gathering, while its rechargeable light source ensures effortless placement and easy handling. Available in White, Orange, Yellow, and Red, the lamp offers an atmospheric lighting experience – with diffused light radiating upward and outward into the surrounding space.

With a design rooted in geometry and joy, the Wire Portable Lamp is a playful and useful companion, equally at home on a terrace, bedside, or bookshelf. Its rechargeable functionality, sleek form and futuristic charm make it an ideal addition to both personal or professional spaces.

—

Born in 1926, Verner Panton came to represent a new direction and energy in Danish design history – deeply original, daringly experimental – for close to five decades. Creating visually distinctive furniture, lighting and objects as well as immersive interiors, his spirit and work remains radically ahead of the curve. Concerned with the future and our capacity to imagine it, his vast output is full of vibrant and playful pieces with a social character, made to be enjoyed, for pleasure.

VERPAN – for Verner Panton – is a design company working closely with Verner Panton Design AG to preserve, reissue and recontextualise the Danish architect and designer's radiant body of work – from minute objects to immersive environments. Verner Panton's lighting and furniture is testament to a playful and unconventional spirit, spanning his most celebrated work and recently rediscovered pieces.

Materials
