MAINTENANCE AND CARE

ALUMINIUM

Aluminium is a light and tough material which is very suitable for outdoor applications. Thanks to its self-protective layer, the material has a high resistance to corrosion.

Our aluminium is coated with a powder coat finish, tinted in a variety of colours. This provides an even and tough finish impervious to moisture and easy to clean.

Powder coated aluminium requires a minimum of maintenance. A gentle clean with water and a non-foaming mild detergent every now and then is all it needs! A microfibre cloth or sponge should be used to wipe over the surfaces of the furniture.
