MAINTENANCE AND CARE

GLAZED CERAMIC

Glazed ceramic is a natural material that retains its beauty for years with proper care. Our ceramic pieces are handcrafted, which may result in subtle irregularities in shape. This artisanal process gives each piece its unique character.

To keep your glazed ceramics in optimal condition, we recommend dusting them regularly with a soft, damp cloth. Avoid using abrasive sponges or harsh cleaning agents, as these may damage the surface. Additionally, it is important to prevent prolonged exposure to moisture to avoid staining.

Although glazed ceramic is naturally heat-resistant, we advise against direct contact with extremely hot objects to prevent thermal shock and potential damage.

VARNISHED OAK

Our varnished tables are finished with a water-based lacquer for the protection of the wood and has an good chemical and mechanical resistance.

Regular cleaning with a mild solution of water and natural soap will do the trick!

Please do not sand varnished furniture, as this will damage the protective layer and will thus affect the water and dirt resistance of your furniture.
