## INSTALLATION INSTRUCTION InvisiLED<sup>®</sup> Palette Outdoor 24V

WAC LIGHTING Responsible Lighting®

LED-TCO

## SAFETY INSTRUCTION

- Read all instructions before installing.
- Always turn off power at fuse box prior to installation to prevent electrical shock.
- Intended for out door use, damp and wet locations are permitted.
- For installation by a qualified electrician.
- System is intended for installation in accordance with National Electric Code, and local regulations.

## **INVISILED™ PALETTE OUTDOOR** Tape Lights have polarity for connection.

• Determine the installation area and material, based on different mounting materials (wood or concrete), different mounting accessories will be needed.

## WIRING AND INSTALLATION:

Please refer to installation diagrams shown on next page.

1. Determine the number of separately powered runs needed. Calculate the number of power supplies.

Min. / max. run length	1ft / 40ft per run
Current	100 mA/ft
Power consumption	2.0 Watts/ft

- 2. Measure the length of each run and round it off to the nearest 1 foot interval. Determine the necessary quantities of 1ft, 5ft, and 10ft sections.
- 3. Count the number turns in the runs in order to determine the number of X-RGB, and Y-RGB connectors.
- 4. If making lateral turns at angles other than 90°, determine the number of joiner cables necessary to make the lateral adjustment.
- 5. Connect to incoming 120V supply.
  - Hard Wire
  - Power supply is IP67 rated for damp and wet locations. The power supply should be installed accessible for service
  - Connect building wires to like color power supply wires with wire nuts in the outdoor junction box.
    Building ground wire my be green or un-insulated, and attaches to green wire from power supply box.
- 6. Connect the output female connector of the power supply with the male connector of the outdoor Controller, to form straight lines or turns around the installation surface.
- 7. Connect the female connector of the outdoor Controller with the male connector of the outdoor RGB tape
- 8. Connect the signal female connector of the outdoor master controller with the signal male connector of the signal wires
- 9. End caps of each InvisiLED can be connected together to form a straight run.
- 10. Terminate each separately powered run with an end cap. Install the end cap with silicon for water tight.

## INSTALLATION INSTRUCTION InvisiLED® Palette Outdoor 24V LED-TCO

# WAC LIGHTING

Responsible Lighting®

#### A. USING INSTALLATION CHANNEL - flat surface, exaple: wood

#### **B. USING CLIP 1**

- Suitable for non-flat installation surface, wood or concrete.
- Installation surface have space for the two mounting screw holes.
- No edge contact installation requirement.

#### C. USING CLIP 2

- Suitable for non-flat installation surface, wood or concrete material applicable
- Suitable for single tape edge contact installation

## D. Using Clip 3

- Suitable for non-flat installation surface, wood or concrete material applicable
- Suitable for double tape edge contact installation.
