SAFETY INSTRUCTION

IMPORTANT: NEVER attempt any work without shutting off the electricity.

- Read all instructions before installing.
- System is intended for installation by a qualified electrician in accordance with the National Electrical Code and local regulations.
- Go to the main fuse box, or circuit breaker. Place the main power switch in the "OFF" position and unscrew the fuse(s) or switch "OFF" the circuit breaker switch(es) that control the power to the fixture or room that you are working on.
- Place the wall switch in the "OFF" position.

AVERTISSEMENT

IMPORTANT : Coupez l'électricité avant TOUTE manipulation.

- Lisez toutes les instructions avant d'installer.
- Système est destiné à être installé par un électricien qualifié en conformité avec le code national de l'électricité et les règlements locaux.
- Accédez au panneau central de disjoncteurs ou de fusibles de votre demeure et placez l'interrupteur principal en position d'arrêt (« OFF »).
- Placez l'interrupteur mural en position d'arrêt (« OFF »).

CAUTION

All parts must be used as indicated in these instructions. Do not substitute any parts, leave parts out, or use any parts that are worn out or broken. Failure to follow this instruction could invalidate the UL/cUL listing of this fixture.

OVERVIEW

Housing is new construction Airtight IC. Housing requires a trim for a finished look.

Refer to specification sheets for compatible trim options.

SPECIFICATIONS

Input	120~277V ; 50/60Hz
Installation	IC
Dimming	ELV / TRIAC / 0~10V

HOUSING INSTALLATION:

1. Install housing using two hanger bars (24½" max). Bars are notched on the ends to fit over "T" bars in suspended ceilings (See **FIG. 2A**).
2. Hanger bars include a captive mounting "screw-nail" for ease of installation (See **FIG. 1**). Align the bottom of the hanger bar with the bottom of the wood joist. Secure the "screw-nail" on each end by screwdriver (See **FIG. 2B**), or by hammer (See **FIG. 2C**).
3. Slide fixture housing along bar hangers into desired location. Use locking screws to secure (See **FIG. 2D**).
4. To shorten hanger bars to fit in a 12" joist, snap off one section of the hanger bars (See **FIG. 3**).
5. Remove spring latched fixture junction box door and connect fixture wires to building wires:
Insert each supply wire into appropriate junction box wire connector. This fixture features electronic low voltage (ELV) or TRIAC or 0-10V dimming capabilities (See **FIG. 4**). To utilize ELV or TRIAC, wire black (line hot), white (line neutral) and green (ground) in accordance to dimmer specifications.
To utilize 0-10V dimming, wire purple (dim+), gray (dim-), black (line hot), white (line neutral) and green (ground) in accordance to dimmer specifications. When not using a dimmer, connect black fixture wire to hot, white fixture wire to neutral and green fixture wire to ground. Leave all other wires capped individually.
6. Place all wiring and connectors back in junction box and replace the junction box's cover.

7. For the square housing, rotate the collar frame as necessary should additional adjusting be needed for field alignment. (See **FIG. 5**).

8. Cut out for Round $4\frac{1}{4}"$ or $4\frac{1}{4}" \times 4\frac{1}{4}"$ for Square in the ceiling at the point of installation and install ceiling (See **FIG. 6**).

9. To account for ceiling thickness, adjust the depth of the adjustable collar using an allen wrench (See **FIG. 7**) until button of adjustable collar is in flush with the ceiling surface.

For trimless installations, follow Steps 10 - 11.
Trimmed Installation go to Step 12.

10. Secure the trimless frame to the housing using the four screws provided (See **FIG. 8**).

11. Insert the plaster shield into opening of housing. Apply plaster or spackle over trimless front and sand surface when dry for finished look. Remove plaster shield when finishing is complete. (See **FIG. 9-10**)

12. Prior to installing the light engine into housing, adjust fixture to desired beam angle. Light engine comes factory installed with narrow flood optical film.

To adjust the flood, replace "N" optical film with "F" optical film. For spot and wall wash beams, remove all films. Films install behind optical holder and in front of lens, the glossy side facing outward. (See **FIG. 11-12**). Add accessories if desired behind optical holder. Refer to spec sheet for compatible accessories.

FIG. 12

DO NOT DISCARD RETAIN OPTICAL FILMS FOR FUTURE USE	
FIXTURE BEAM	OPTICAL FILM
NARROW FLOOD	Film Marked with "N" (Film in light engine by factory)
FLOOD	Film Marked with "F" (In Packet by factory)
SPOT & WALL WASH	No Film (Remove films from light engine)

13. Connect the light engine to the housing using the power connector. Insert the light engine into the housing until it is secured by two spring clips on each side (See **FIG. 13**).

14. For aiming of adjustable or wall wash fixtures: Push the side of the light engine using your hand to increase the tilt angle of the light engine (See **FIG. 14**).

To decrease the tilt angle, insert a screwdriver into the opening on the side of the light engine and pull the light engine into the desired position (See **FIG. 15**).

NOTE: For a standard wall wash angle, please align the clip with the "W" symbol on the light engine (See **FIG. 16**).

15. Refer to installation instructions for appropriate trims to complete the installation.

LIGHT ENGINE REPLACEMENT:

Before removal, realign module to the 0° position.
To remove the light engine from the housing, use a flathead screwdriver to press down on the spring clips on each side until the light engine is released (See **FIG. 17**).

DRIVER REPLACEMENT:

To replace the driver, unscrew the wingnuts on the inside the housing. Remove the cover over the driver and replace the driver before securing back into its original position (See **FIG. 18**). To allow for more space when working in the housing, remove the adjustable collar by unscrewing 4 screws.
