This product is suitable for damp locations.

This product can be dimmed with a low-voltage electronic dimmer.

This instruction shows a typical installation.

CAUTION - RISK OF FIRE

This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Use minimum 90°C supply conductors.

SAVE THESE INSTRUCTIONS!

Note: Multiple fixtures may be interconnected at any distance apart in accordance with NEC specifications.

Install the Fixture

- 1 Place and level the unit in the desired position.
- 2 Mark the two points under the cabinet through the mounting holes.

- 3 Secure the fixture with the provided mounting screws.

1C

- 4 Push the two buttons back and swing open the cover.
- 5 Remove a knock out from the desired connection location

1D

- 6 Install one of the provided conduit connectors.
- 7 Feed the flexible conduit and the power lines into the fixture and secure it by tightening down the screws on the conduit connector.

1E

- 8 Connect the white fixture wire to the neutral power line with a wire nut.
- 9 Connect the black fixture wire to the hot power line with a wire nut.
- 10 Connect the fixture to a suitable ground in accordance with local electrical code.
- 11 For models with an occupancy sensor: see included manufacturer's instruction for adjusting the settings and additional information.
- 12 Properly place the wires and wire nut connections into the fixture.
- 13 Close the cover and slide the two buttons to lock it in place.
